ALGORITMA PEMROGRAMAN**

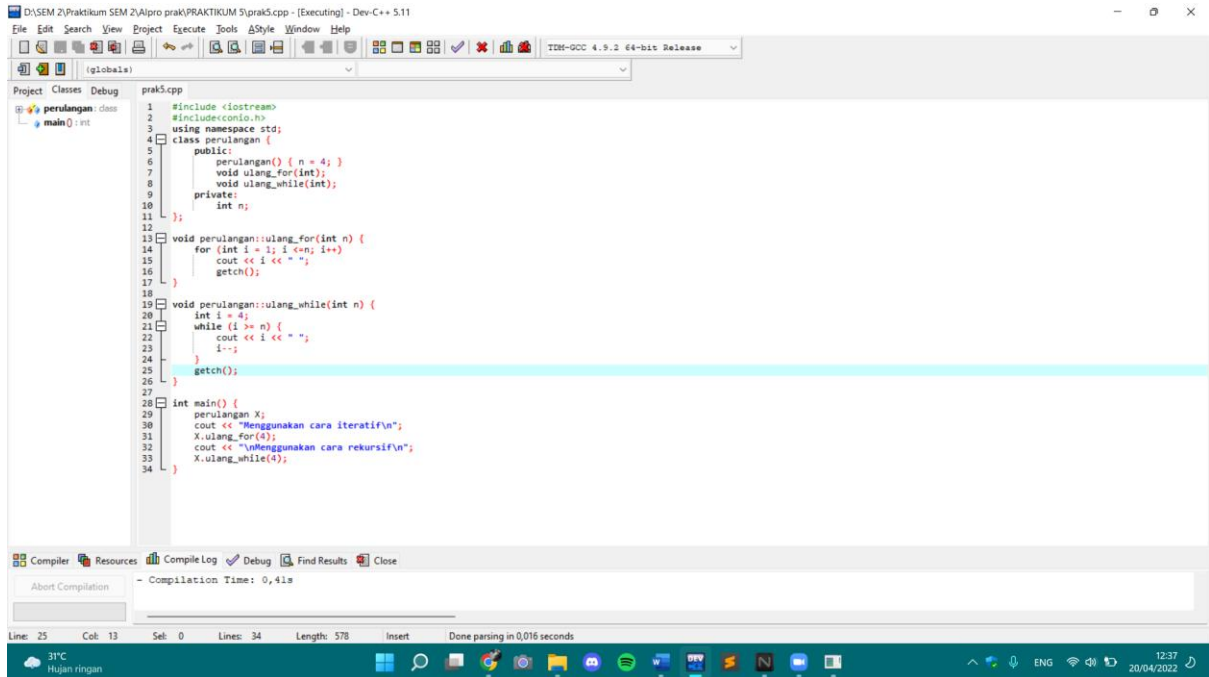

**DI SUSUN OLEH :
Muhammad Faiz Akbar (2100018361)
SELASA 13.30 – Kelas G**

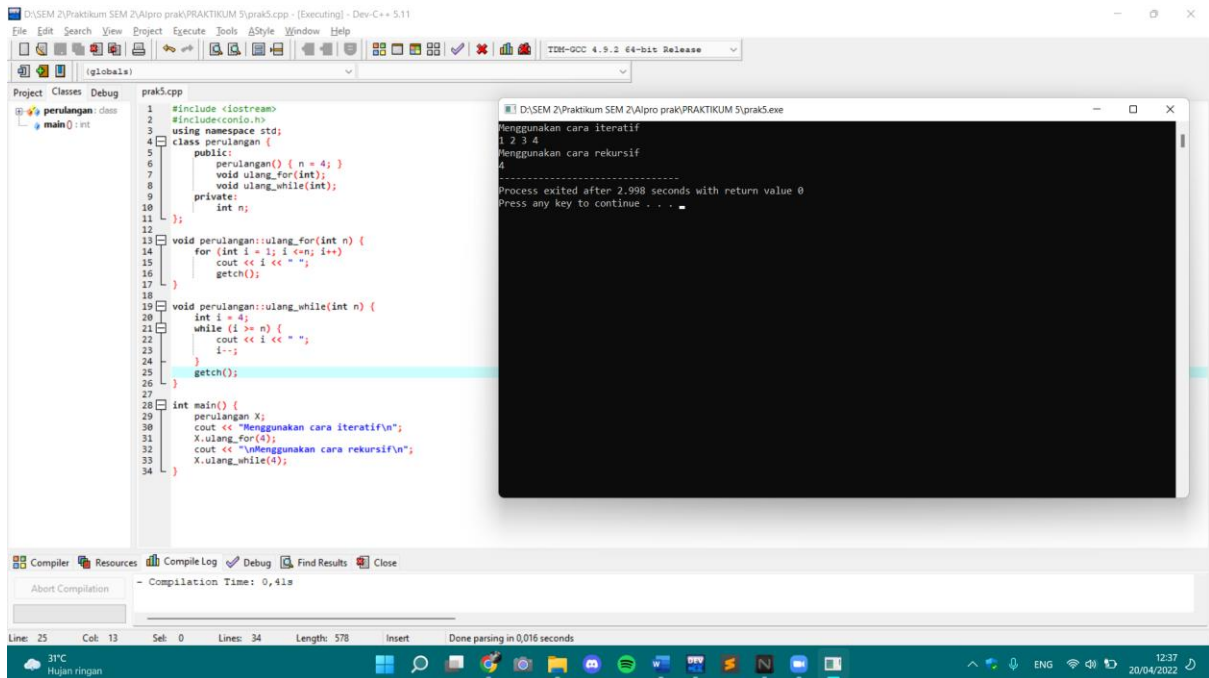

**PROGRAM STUDI INFORMATIKA
FAKULTAS TEKNOLOGI INDUSTRI
UNIVERSITAS AHMAD DAHLAN
APRIL 2022**

KEGIATAN 5

- Screenshot text editor

- Screenshot saat menjalankan program

STUDI KASUS

Dengan nama kelompok :

- Rifal febiyan
- Muhammad Faiz Akbar
- Arrijal Firmansyah

The screenshot displays a GitHub repository page for 'rifal2100018345-prac-alpro'. The top section shows a list of file updates, including 'input.h', 'input.h.gch', 'main.cpp', 'main.exe', 'output.h', 'output.h.gch', 'proses.h', and 'proses.h.gch', all updated by 'FaizAkbar26'. Below this, the 'output.h' file is selected, showing its latest commit by 'FaizAkbar26' and two contributors. The file content is a C++ code snippet defining a namespace 'std' and a class 'Output' with a 'getData()' method. The code includes logic for reading data from 'apldata.txt' and processing it based on conditions like 'name', 'nomor', and 'bnyk'.
